

Maintenance Skills Assessment

The future of business is based on highly automated manufacturing systems. The companies that succeed will have employees who are trained for that future.

Our Training Plans are Unique

An individual training plan is developed for each person evaluated. The training is designed to improve deficit areas only. This allows for the maximum benefit of time and training dollars.

Complete Evaluations

Assessment teams will conduct the evaluations consisting of eleven written, seven identification and application, and six performance activities. The results of the evaluation give both the individual and the company a full summary with training recommendations.

Our Goal

The goal of the Maintenance Skills and Assessment is to improve performance, your business, and the confidence and skill level of each person we work with in your company.

Assessment Results Include:

Assessment, results with detailed explanation, an Individual Training Plan.
