

April 18, 2018

Dr. Ray Perren
President
Lanier Technical College
2990 Landrum Education Drive
Oakwood, GA 30566

Dear Dr. Perren:

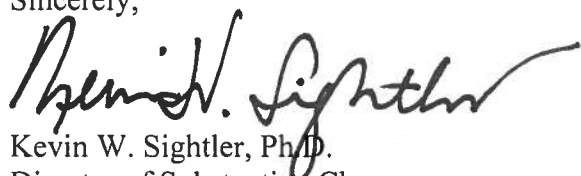

Thank you for your letter of April 26, 2017, notifying the Commission of the intent to repackage a number of courses to offer a new program at the Oakwood and Barrow campuses beginning August 2017. We regret the delay in responding to your notification. E-mail correspondence from Dr. Joanne Tolleson on April 13, 2018, noted the program will be the Associate of Applied Science (A.A.S.) in Wireless Engineering Technology, which was already approved in a Commission letter dated November 1, 2016. A follow-up telephone conversation with Dr. Tolleson on April 18, 2018, concerning the notification letter for the approved program confirmed the following:

- 75% of the courses remain the same in the A.A.S. in Wire Engineering Technology program as originally structured
- 25% of the courses have different course titles or course prefixes with the majority of course content the same
- Program competencies remain the same and have not been affected

The program changes do not appear to be a substantive change.

We acknowledge the information and will add it to our files.

Sincerely,

Kevin W. Sightler, Ph.D.
Director of Substantive Change
