Way to go

Here's what students are saying about MMO:

The MATH 0090 class was definitely beneficial to me, it helped prepare me for what the next level class, college algebra, was going to be.

I think Math 90 helped me more than anything so I believe I would recommend it, especially to students who have taken time off of school like myself who need a little refresher.

-Breanna Simmons

Math 0090B and Q helped me because Miss Amanda showed me each skill step by step and that was helpful for me since I had been out of college since 2008.

I would recommend MATH 0090B and MATH 0090Q if you struggle with math and have anxiety with math. This class will help you cope with it.

-Shkeya Daniels

Taking MATH 0090B and MATH 0090Q made it a lot easier to transition from high school math to the college class I have now. It was a solid mix of pace which was helped prepare me for the speed this current class is.

Thomas Luna was my instructor. I would recommend MATH 0090B and MATH 0090Q because it definitely helps you adjust to how college is going to go while still giving you that extra guidance like we had in high school.

I attended the Tutoring Student Success Center once, towards the end of the semester. It was super beneficial. I had the "nodding" support I needed in order to help me become confident in what I was doing.

-Brooklynn Dowdie

I went into MATH 0090B and Q class with very little mathematical background. I have always been terrified of math, which is one of the reasons I waited so long before I went to college. These classes were life changing for me. Not only did I learn to enjoy math in a way I never have before, but they also prepared and equipped me with exactly what I needed for college algebra. I took college algebra after I completed MATH 0090B and Q and I felt as though I had a head start in the material that was taught in my algebra class. After speaking with several of my fellow classmates, I realized that not everyone had this same feeling in algebra class and I contribute my preparation for college algebra to MATH 0090B and Q.

MATH 0090B and Q were not as fast paced as college algebra was to me. They were more relaxed and started from the basics, which I needed. The layouts of the material for these classes were very similar to college algebra, but they were more basic information, whereas college algebra took the material to a higher level.

My teacher for both of these classes was Vincent Prior.

I would definitely recommend MATH 0090B and Q to other students! I have already recommended these classes to some of my siblings who want to start college soon. I would not have been able to pass my college level math classes if I had not taken MATH 0090B and Q first. I could not speak highly enough of these classes and how much help they have been in my college endeavors!

-Laura Miller

Math Haiku Contest

In our previous issue, we asked you to write a haiku about math.

Everyone's a winner!

Thank you for your amazing entries!

Why do we learn math?
The math teaches you to
think Mother of Science

Mekhpule Khasanova

Empty set is life
We make circles together
Our dreams come true soon

Sunkyung Koo

Man plus woman, they
Multiply and then they die.
Oh, math of our lives.

Dmitry Popov

Math, only you can
make visible something vague
What a great you are!

Ryoko.K

Life plus and minus
multiplied by this and that
divide by me and you

Lisbetty Blanco

I hate math so much
Plus, minus, times, and divide
Makes me angry fast

Nadia Sahdi

Life is just like a
Quadrangle, parallel lines
Could be related

Yilan Zhu

Math is difficult
Plus and minus are easy,
Divide is crazy.

Carla Valderrama

Math, you are the art of
thought,
Dance of the numbers,
Music for the reasoning.

Maria Rodriguez

I don't like math, my
life is not exactly as
Two plus two is four.

Ketrin Muterle

Daffodils in bloom.
Is that a robin I see?
Oh my! Spring is here

Sharon Tyre

Queen Mathematics
Rule the kingdom of science
But show us mercy!

Dusza Malgorzata

Math, Math, Math, you are
Like flying pollen from trees
Dizzy counting you

Vivian Tsao

Formula Functions
With calculations summon
Equation's answer

Rachel Newsome

Infinite cultures'
Additions might multiply
Our best expressions

Camilla Wulten

Math lesson in school -
My teacher tells me daily:
You need math in life!

Mara Lammers

Hey I love you math.
You are easy for me but,
others hate you so.

Katrin Duebe

Calculators are
Like relationships; only
Good as what's put in.

Tim Thomas

Miles of blue ocean
magnitude and direction
so lost without them...

David Roberson

Absolute value
Negatives are not found here
Think positively

Steven James
