What Comes Next

What comes after you complete your Math Learning Support requirement? Your next step is to enroll in the degree level math class that is required for your program of study. The best person to help you choose this class is your advisor. So, make that appointment and speak to your advisor soon.

Whichever math you choose, remember:

- Try to enroll in your degree level math class the semester following your Math Learning Support class. MATH 0090B/Q and MATH 0090C prepare you for your degree class; you should not take a semester off.
- It has been shown that Math Learning Support students that complete at least 80% of their homework are 2 to 3 times more likely to pass their class. So, do your homework. And, utilize the Student Success Center (SSC) for help. The tutors at the SSC are there and waiting to help you.

What if you didn't pass your Math Learning Support classes? If you passed the study skills part of the class (MATH 0090Q) but not MATH 0090B, you will need to enroll in MATH 0090C. This class is designed to focus on the algebra skills necessary for your degree level math class. If you did not complete MATH 0090B and MATH 0090Q, you will need to retake both classes.

Above all – don't give up! You are changing your future. Math Learning Support is a bridge, not a gate. You can do it!!

Secret to My Success

I really recommend going to tutoring centers.

Irada G.

Pi Day!

Why I Teach Math

Tom Luna: *I love math, because the rules never change. I love teaching math because students get set free from years (decades?) of self-persecution and disappointment. Success in Math for many students is liberating.*

Keri Rhinehart: *I teach math because it's fun and there is always room to improve instruction. It never gets boring because I am always trying to find new ways to help students understand.*

Secret to My Success

...create and organize a math binder. This binder helped me stay organized and allowed me to look back at any problems I struggled with. Do all of the homework and ask questions when you are confused.

Megan S.

LUNCH AND LEARN

Lunch and Learn workshops are great opportunities for you to enjoy a free lunch/breakfast while learning about different topics. The Spring 2019 Lunch and Learn focus was on "Study Skills".

Balancing the many aspects of your life (school, family, social, etc.) is challenging. Learning how to manage this

balancing act is crucial to success in college. The presenters at the Spring Lunch and Learn demonstrated how to use organizational techniques such as calendars and notebooks to help you get organized. Also, study techniques such as study environments, learning styles, anxiety reducing strategies, and other topics were discussed.

Do you have a study schedule? Do you know when the best time is to study math or English or psychology? Do you know where you should study and how to improve your memory? A power point is available to any student that would like to review these topics; email Susan Baker at sbaker2@laniertech.edu.

Be sure to RSVP for the Fall 2019 Lunch and Learn at any of the LTC campuses.
