Summer Semester is Here!

The summer semester has begun, and if you feel like it is moving quickly, you would be correct. The summer semester is only eight weeks long but covers all the material as the fall and spring semesters do. Is it possible to learn all the material in this short time frame? YES – it is possible, but you must have a plan. Here are several strategies that can help you be successful.

- Attend class every time it meets.
- Stay caught up with your homework and work ahead when possible.
- Review your class notes immediately after class. This will help you to remember what you learned in class.
- Visit the Student Success Center (SSC). This is a great place to study or meet your study group. When you need help, there are tutors available.
- Begin studying for tests several days before the tests.

These are only a few suggestions; the tutors in the SSC may have other tips they can offer you. There is also a handout available in the SSC that gives tips on How to Study for and Take a Test. The SSC schedule is at the end of this newsletter and posted around campus. Here is the link to the schedule online

<https://www.laniertech.edu/Tutoring.aspx> .

Go by and check it out.

Have a great summer semester.

Why I Teach Math

Kelly Gurske: I teach math because I love seeing people learn. I chose math in particular because it's like a puzzle. I like seeing all the pieces of a puzzle come together and make a beautiful picture!

Erin Macke: Math was always my favorite subject in school. I like the logic behind it and knowing that if I just follow the steps correctly, I will arrive at the correct solution. I teach it because I enjoy sharing my passion for the subject. Seeing students succeed in a subject that many find challenging is a reward like no other.

Secret to My Success

My secret to success is asking questions. No matter how silly you might think they are, always ask the question. Also, attending class regularly. You can't ask questions if you aren't present. Cayla C. (Interdisciplinary Studies)

I always try to do my best and never give up. You have to have confidence in yourself and never let yourself down. Lesia L. (Early Childhood Care & Education)

I re-evaluate my study habits at least every couple weeks to see what is working and not working, then apply techniques to improve. Jennifer T. (Medical Assisting)

Managing my time wisely and taking advantage of the resources provided to me here at Lanier Technical College. Jennifer W. (Interdisciplinary Studies)

Before taking your test go over the material that you are struggling with, it will be fresh in your mind and will be easier to remember during the test. Cobi W. (EMS Professions)
